

Case Studies

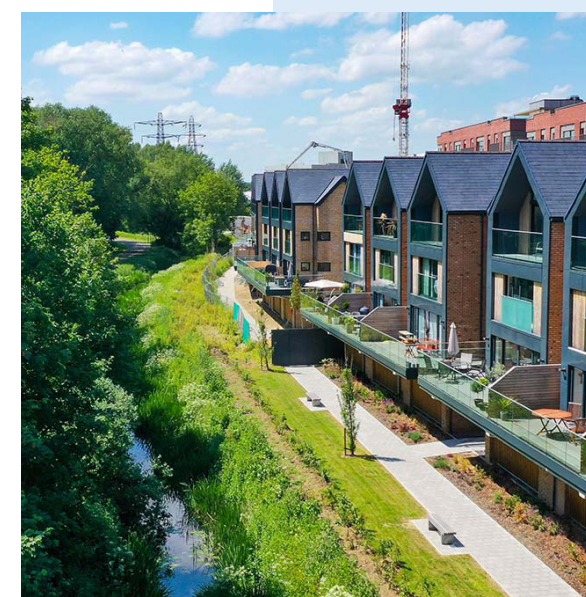

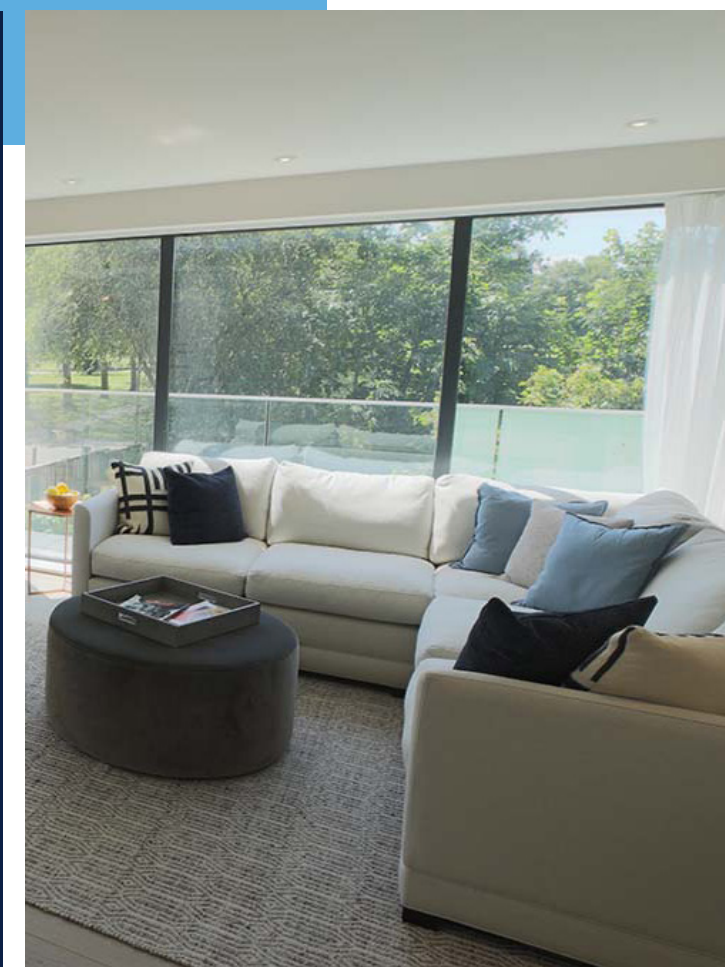

Riverside Park, Ashford

Riverside Park has 213 contemporary apartments across five buildings and 26 luxury townhouses. The homes have been built around a central courtyard and public realm overlooking the Great River Stour and nearby Victoria Park. All the homes feature balconies to make the most of their location and the apartments feature communal roof terraces. Riverside Park is only a short walk from both Ashford town centre and Ashford International Train Station.

We provided consultancy services to the developer before handover and were officially appointed as managing agent on completion of the first phase in 2019.

We manage three of the five apartment blocks (as two were sold on) and the wider estate. We employ a full time caretaker, who has been with us since inception to provide a first-class service to this prominent development and its residents.

The Client requires an introduction prior to contact.

“We work with a large number of management companies across the UK and the service that Rendall & Rittner provide is, without a doubt, the most efficient, professional and helpful. I would definitely recommend them to anyone looking for building management services.”
